OBJECTIVE

Information Technology student with hands-on experience in business process analysis, BPMN modeling, requirements analysis, and stakeholder collaboration. Currently gaining practical BPM experience at Azercell using SAP Signavio and contributing to process improvement and system documentation. Seeking an entry-level IT Business Analyst opportunity where I can combine technical knowledge with business analysis and process optimization skills.

EDUCATION

ADA University

Bachelor's in information technology (CGPA 3.56)

Baku, Azerbaijan

Expected May 2027

- Selected coursework: Business Process Modeling for IT Solutions, Systems Analysis & Design, Cyber Security Fundamentals, Database Systems, Data & Information Engineering, Intro to Big Data Analytics, Web & Mobile (I), IT Systems: Hardware & Software, Principles of Distributed Systems, Programming Principles (I,II), Calculus(I,II), Discrete Structures, Linear Algebra, Data Structures & Algorithms, Introduction to Computer Networks, Leadership, Entrepreneurship

Baku Design Center

UX/UI Design

Baku, Azerbaijan

December 2024

- Gained skills: Prototyping, Wireframing, UX Research, Figma, Adobe XD, User Journey Mapping, Usability Testing, Human-Centered Design, Responsive Design Principles.

High School N67

Ganja, Azerbaijan

June 2022

- SSAC(TQDK) Score:658/700

RELEVANT EXPERIENCE

Azercell Telecom LLC

BPM Intern

Baku, Azerbaijan

June 2026 – Present

- Collaborate with stakeholders to understand system requirements and develop user guides for newly implemented IT systems, supporting effective adoption and consistent usage
- Assist in analyzing and documenting business processes across different departments
- Create and update BPMN diagrams to visualize process flows, roles, decision points, and dependencies
- Use SAP Signavio to model, review, and maintain business process documentation
- Support the preparation of process descriptions, procedures, guidelines, and other internal documentation
- Collaborate with process owners and relevant stakeholders to identify process gaps and improvement opportunities

AzTelcoGroup

InfoSec Intern

Baku, Azerbaijan

May 2026 – June 2026

- Assisted in deploying and configuring Wazuh agents to monitor endpoints, collect security logs, and identify potential threats
- Used Greenbone Vulnerability Management to perform vulnerability assessments and review detected security weaknesses
- Conducted network and port scans to identify open ports, active services, and potential security risks within systems

-
- Supported phishing simulation campaigns using GoPhish to evaluate employee awareness and analyze campaign results
 - Gained practical experience in security monitoring, vulnerability management, threat detection, and basic system hardening

Prime Cotton LLC

Baku, Azerbaijan

IT Intern

June 2025 – August 2025

- Assisted the IT staff in fixing and debugging hardware, software, and network components to reduce downtime in the company
- Assisted a team of 8 in deploying updates and system configuration spanning several departments, achieving internal deadlines ahead of schedule
- Contributed to documenting internal IT procedures and creating user guides to increase effectiveness and reduce redundant support work
- Gained hands-on experience with cybersecurity techniques such as basic threat detection and system hardening

ACTIVITIES & AWARDS

- **Teaching Assistant-Systems Analysis & Design:** assisted the instructor with assignment management and coordination
- **Dean's List:** awarded twice for strong academic performance at ADA University
- **High Honor List:** awarded once for outstanding academic achievement at ADA University
- **Haci Zeynalabdin Tagiyev award:** Worked in a team to build an educational website, organize online bootcamps, teach coding at schools, and run a hackathon offering course discounts to winners.
- **Technest Scholarship:** Awarded a 100% scholarship based on academic performance and competitive selection.
- **4SIM Scholarship, Azerbaijan Ministry of Economy:** Awarded a Coursera membership scholarship twice, in 2025 and 2026.

PROJECTS

PostgreSQL Database Design and SQL Demonstration: Designed relational database structures using primary keys, foreign keys, constraints, and normalized tables. Implemented joins, views, materialized views, and transaction management operations including COMMIT and ROLLBACK.

Query Execution Plan and SQL Optimization: Analyzed PostgreSQL query execution plans using EXPLAIN, execution costs, join strategies, and index usage. Evaluated query performance and proposed optimization techniques based on relational algebra and database indexing principles.

Paws.az — Pet Services and E-Commerce Platform: Built a responsive React and Vite frontend for a pet services and products platform. Implemented product search, shopping cart, favorites, authentication, user dashboards, blog, donation, and service-provider registration features using React Context API.

REST API Reliability and Availability Analysis: Created a Bash and cURL-based testing workflow that sent 120 requests to a REST API and recorded HTTP status codes and response results in CSV format. Analyzed the collected data in Excel to calculate service availability and identify request failures.

Near-Real-Time Fraud Alert Pipeline: Developed an end-to-end data engineering pipeline using Python, Apache Airflow, PySpark, Apache Kafka, and Docker Compose. Processed transaction data, detected suspicious activities, streamed fraud alerts, and integrated a Telegram bot for real-time notifications.

Big Data Technologies Research Projects: Completed academic projects on Apache Spark, Apache Kafka, Hadoop, and MapReduce. Explored distributed data processing, event streaming, large-scale data storage, and parallel computation concepts.

Tech4Equity: Collaborated with a team to design and develop an Azerbaijani-language educational website that helps children learn coding and makes technology education more accessible. Organized online bootcamps, delivered coding lessons, visited schools, and supported students in remote regions. The team

also conducted a hackathon where winners received discounts on technology courses. The project earned second place in the Haji Zeynalabdin Taghiyev Award for its community impact, teamwork, and contribution to digital inclusion.

Book Library: Developed a Java and Java Swing-based library application with my team, supporting a collection of 83 books and allowing users to add, rate, and delete books.

Digital Logic Design: Designed and simulated a sequential hexadecimal counter and a seven-segment name display using digital logic circuits. Applied counters, combinational logic, and display-control principles to build functional circuit designs.

Hour of Code: Taught basic coding to 30 school students through Hour of Code, sparking a 30% increase in students interested in STEM activities after the workshops. Additionally, developed a webpage for project sustainability.

ADDITIONAL INFORMATION

Languages: Azerbaijani (Native); English (Fluent); Russian (Beginner)

Technical Skills: Business Process Analysis, Requirements Analysis, BPMN/UML, SDLC, Agile/Scrum, SAP Signavio, Bizagi, Jira, Confluence, Technical Documentation, SQL, Query Writing, Relational Databases, Database Design, ERD, Normalization, Power BI, Microsoft Office Suite, Git, Figma, Hadoop, Spark, Cybersecurity Fundamentals, Network Security Basics, Access Control, System Hardening, Basic Threat Detection, Greenbone, GoPhish.

Soft Skills: Analytical Thinking, Problem Solving, Stakeholder Communication, Cross-functional Collaboration, Attention to Detail, Technical Writing, Leadership, Teamwork, Adaptability.
